

# Energy Pyramid

## 10 Percent Rule

➤ Label and define all parts kept blank in the given energy pyramid

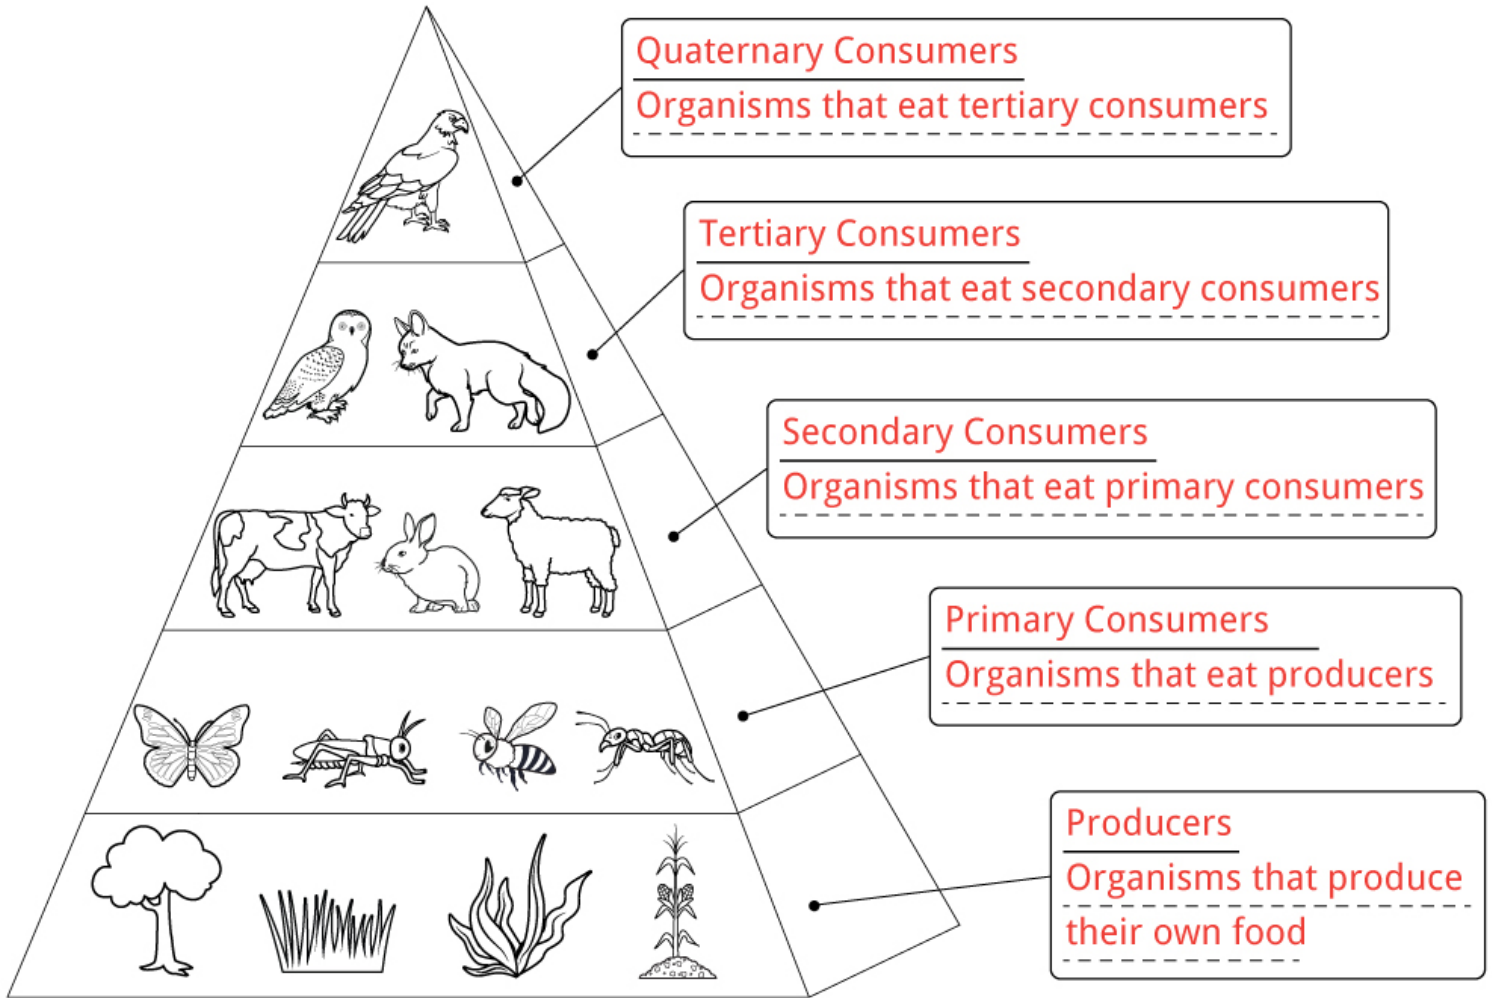

➤ Fill in the blanks with the appropriate word.

- Energy \_\_\_\_\_ as we move up the pyramid.
- An energy pyramid represents the amount of \_\_\_\_\_ at each trophic level.
- An energy pyramid follows the \_\_\_\_\_ rule, which says that \_\_\_\_\_  
\_\_\_\_\_.
- The organisms that feed on dead plants and animals and help recycle them are called \_\_\_\_\_.
- Both \_\_\_\_\_ and \_\_\_\_\_ act as decomposers.

# Energy Pyramid

## 10 Percent Rule

- Energy decreases as we move up the pyramid.
- An energy pyramid represents the amount of energy at each trophic level.
- An energy pyramid follows the 10% rule, which says that about 10% of energy from each level reaches the level above it, and the rest remains unutilized.
- The organisms that feed on dead plants and animals and help recycle them are called decomposers.
- Both bacteria and fungi act as decomposers.
