

Name: _____ Date: _____

Energy Pyramid

The diagram of an energy pyramid is given below.
Label the different trophic levels of the energy pyramid using the word box.

Producers Tertiary Consumers Secondary Consumers Primary Consumers

Q1) How many trophic levels are there in an ecosystem?

Q2) What are producers?

Q3) Name three organisms found in each trophic level of the food chain.

Producers: _____

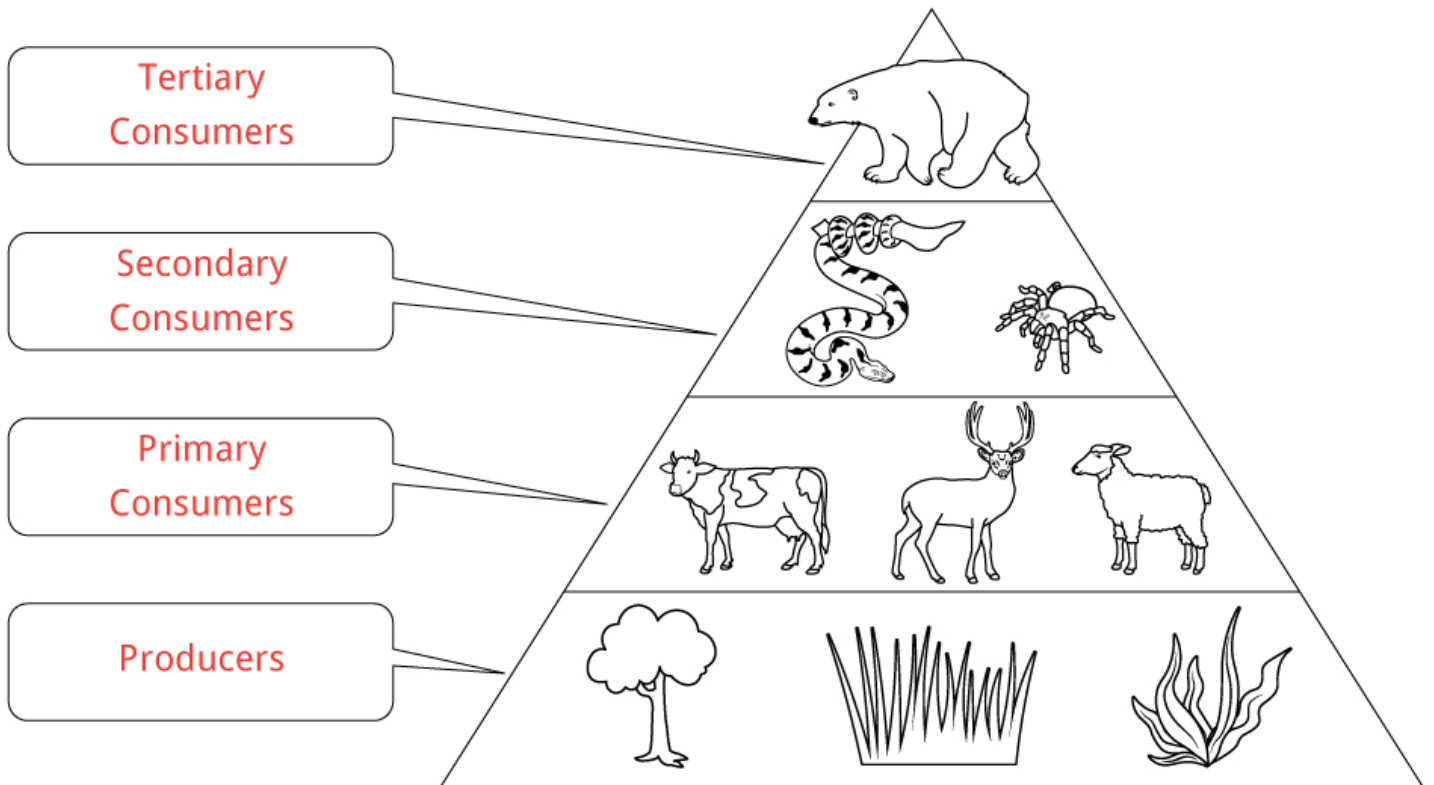

Primary Consumers: _____

Secondary Consumers: _____

Tertiary Consumers: _____

Name: _____ Date: _____

Energy Pyramid

Q1) How many trophic levels are there in an ecosystem?

Four.

Q2) What are producers?

Producers are organisms that can produce their own food.

Q3) Name three organisms found in each trophic level of the food chain.

Producers: Plants, grass, and algae.

Primary Consumers: Cows, deer, and sheep.

Secondary Consumers: Snakes, seals, and spiders.

Tertiary Consumers: Hawks, lions, and polar bears.
