

Earthquakes and Volcanoes

Tick the correct answer

1. Hot gases and lava are produced by
 - i) Earthquakes
 - ii) Tornadoes
 - iii) Volcanoes

2. Melted rocks emerge on the surface due to the activity of
 - i) Earthquake
 - ii) Volcanoes
 - iii) Soil Erosion

3. Volcanoes that have not erupted in a long time are called
 - i) Dormant
 - ii) Extinct
 - iii) Active

5. Underwater earthquakes resulting from tectonic plate movements cause
 - i) Hot springs
 - ii) Tidal waves
 - iii) Geysers

6. It is a funnel-shaped depression found above the opening from which volcanic material is released
 - i) Lava
 - ii) Vent
 - iii) Crater

7. It is the point under the Earth's surface where an earthquake originates
 - i) Vent
 - ii) Epicenter
 - iii) Mantle

Earthquakes and Volcanoes

Tick the correct answer

- Hot gases and lava are produced by
i) Earthquakes ii) Tornadoes iii) Volcanoes ✓
- Melted rocks emerge on the surface due to the activity of
i) Earthquake ii) Volcanoes ✓ iii) Soil Erosion
- Volcanoes that have not erupted in a long time are called
i) Dormant ✓ ii) Extinct iii) Active
- Underwater earthquakes resulting from tectonic plate movements cause
i) Hot springs ii) Tidal waves ✓ iii) Geysers
- It is a funnel-shaped depression found above the opening from which volcanic material is released
i) Lava ii) Vent iii) Crater ✓
- It is the point under the Earth's surface where an earthquake originates
i) Vent ii) Epicenter ✓ iii) Mantle
